

Project Initialization and Planning Phase

Date	15 March 2024
Team ID	
Project Name	CreditCard Approval Prediction
Maximum Marks	3 Marks

Problem Statement:

Banks and financial institutions receive a large number of credit card applications every day. Manually evaluating these applications is time-consuming and prone to errors. The objective of this project is to develop a Machine Learning based Credit Card Approval Prediction System that can predict whether an applicant's credit card request will be approved or rejected based on their financial and personal information.
